Statutory Requirements

Details in this report were submitted to the Governor and Florida Legislature on December 15, 2014 to comply with the requirement of section 402.81, Florida Statutes, regarding annually reporting to the Legislature the number of individuals served, use rates, and expenditures under the Pharmaceutical Expense Assistance Program.

Summary

The Pharmaceutical Expense Assistance Program was established on January 1, 2006. The purpose of the program is to pay coinsurance and deductibles for certain Medicare Part B drugs related to cancer and organ transplant for patients that are eligible for Medicaid through the Medically Needy category.

Under the Pharmaceutical Expense Assistance Program these specific drugs are paid with state funds, and individuals eligible for the program are not required to meet their Medicaid share of cost obligation prior to coverage. Further, expenditures for the drugs covered under this program do not count toward the individual's share of cost requirement for other Medicaid funded services.

Only those 652 individuals who initially met eligibility requirements as of January 1, 2006 were enrolled in the program. The program included Medicare eligible individuals who were also eligible under the Florida Medicaid Medically Needy program and who had been diagnosed with cancer or were organ transplant recipients. No new enrollees have been added, and through attrition, the number of individuals who accessed the program has steadily declined.

During the period covering Federal Fiscal Year (FFY) 2013-14, between 34 and 42 unique individuals accessed the program in a quarter. The state reimbursed crossover claims for coinsurance and deductible amounts for specific cancer and anti-rejection drugs for a total of \$33,810.26 during FFY 2013-14. Table 1 on the following page shows the number of unique individuals and total state reimbursements by quarter for the program.
